### Endangered Species; Permits

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of an application for a scientific research permit (1102).

**SUMMARY:** Notice is hereby given that the Washington Department of Fish and Wildlife at White Salmon, WA (WDFW) has applied in due form for a permit that would provide authorization for takes of endangered and threatened anadromous fish species for the purpose of scientific research.

**DATES:** Written comments or requests for a public hearing on this application must be received on or before December 1, 1997.

**ADDRESSES:** The application and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Protected Resources Division, F/NWO3, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400).

Written comments or requests for a public hearing should be submitted to the Chief, Protected Resources Division in Portland, OR.

**FOR FURTHER INFORMATION CONTACT:** Robert Koch, Protected Resources Division, 503-230-5400.

**SUPPLEMENTARY INFORMATION:** WDFW requests a permit under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

WDFW (1102) requests a 3-year permit for an annual take of adult, endangered, naturally-produced and artificially-propagated, upper Columbia River steelhead trout (*Oncorhynchus mykiss*); adult, threatened, Snake River steelhead trout (*Oncorhynchus mykiss*); adult, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*); and adult, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) associated with scientific research to determine the number and timing of wild and hatchery steelhead trout that pass Bonneville Dam on the Columbia River in the Pacific Northwest and to determine the number and timing of wild and hatchery steelhead trout in the treaty fishery conducted by Native Americans on the river. Data will be used to determine the fishery impacts to ESA-listed stocks and if possible, to shape fisheries to reduce impacts to ESA-listed or depressed stocks while focusing harvest on healthy stocks. Tissue analysis by starch-gel electrophoresis will be the genetic stock identification tool used to differentiate

steelhead trout groups by Evolutionarily Significant Unit (ESU). Current steelhead trout accounting methods (date or fork length) are insufficient to differentiate the passage, timing, and harvest impacts on specific ESUs, stocks, or genetic groups. ESA-listed adult fish are proposed to be captured at Bonneville Dam, anesthetized, measured and sampled for tissues and scales, allowed to recover from the anesthetic, and released. ESA-listed adult fish carcasses are also proposed to be sampled for tissues and scales.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on this application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: October 27, 1997.
